People with target disease / condition Large-scale testing in people with target disease / population On what does phase 3 prove? People with target disease / condition Large-scale testing in people with target disease / population It is a minor detail, but to hit at home the concept of how few drugs do it to the market, please fill the empty spaces (straight out of the book): For each

Requirements Improve market time and reduce toxicity Accelerate market time and manage risk Congratulations with FDA requirements and improve effectiveness What is the primary objective of Phase 3 clinical trial? The collection and analysis of highly effective end-point data. The optimal range of effective dosage. The analysis of the data results from the small target population. What phase of clinical development is the biggest investment in both time and money? On which two criteria does the FDA classify NDAs? The novelty of the active ingredient and market time The balance between safety and effectiveness Newness of the active ingredient and clinical improvement Clinical improvement and effectiveness of the product What technique is the least common method used to protect the integrity of clinical trial results? Control and placebo groups What is the main factor of delay in the study?Medical Affairs focus mainly on: Provistes with medical doctor Approved and launched drugs pending FDA Approval Drugs in the discovery process On what does Phase 1 prove? People with target disease / condition Large-scale testing in people with target disease / population What is the approximate ratio of potential compounds at the beginning of development to the number of products that eventually get FDA approval? On average, it takes _____ years to do research and discovery test to bring a new drug to the market. What is not a reason why promising compounds could be abandoned? Poor absorption or ineffectiveness What percentage of clinical development studies are conducted by CRO? Pharmacology of Herbal Medicine Pharmacology
